

### LED Light Pocket – the new way to illuminate posters

Light Pocket is an eye catching way to illuminate your posters and graphics that adds sparkle and interest drawing attention to your promotional messages.

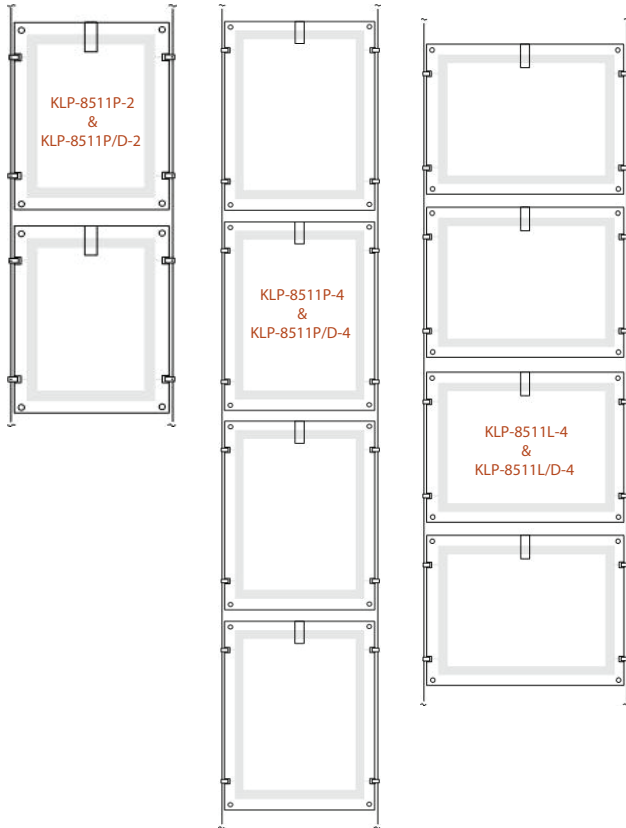

Position in the window or interior of your premises. Make stunning window displays or use the double sided units to create partitions within your premises. Single sided units are excellent for brightening up dark areas of a room.

Transform the appearance of your premises with these ultra slim LED light boxes that are only 9/16" (14 mm) thick. The floating LED light boxes look different from anything else on the market. The Light Pocket is suspended from almost invisible powered cables which are fitted between floor and ceiling.

- **Ultra bright and floats like magic with no visible power supply, drawing people to look at your graphics -**  
Light Pocket LED's last for up to 100,000 hours
- **Incredibly slim - only 14 mm (9/16") thick -**  
Available as Single and Double Sided, Landscape and Portrait
- **Highly energy efficient -**  
Uses very low levels of electricity
- **Quick and easy poster change -**  
Uses up to 90gsm or back lit ink-jet prints
- **The Light Pocket is suspended from almost invisible powered cables which are fitted between floor and ceiling -**  
Small power supply (no large transformer to hide)
- **Maintenance free -**  
No need to change tubes or lamps
